(+963)937-005-234

**Residence:**

Damascus / Syria

## Projects

### ❖ Invoices payment:

A regular control panel for debt collection companies responsible for collecting debts, paying bills to banks, sending them bills divided by payments, and displaying detailed reports on bills.

In addition to the possibility of modifying banks and products and adding users with different permissions and powers.

**“Under development”**

### ❖ Tweety social media:

A social networking application inspired by Twitter that contains basic social networking application features such as adding and editing daily posts, liking and commenting on them, and modifying the user's profile

In addition to being able to explore and follow people.

<https://github.com/KhaledAlHossien/Tweety>

### ❖ Online pharmacy:

A control panel for the pharmacy that enables patients to order medicines through the application and contains a control panel for the application manager who can add new medicines, modify them and process reserved drug requests.
